

IHM Learning Access Plan (LAP)

IHM is committed to providing full support to students with accessibility needs (students with disabilities as per the *Disability Standards 2005*), removing barriers to learning and creating an inclusive environment. Following the assessment of the student's eligibility for support, IHM will offer support, including additional or specialist services, tailored to their specific accessibility needs. They will have additional opportunities to meet the required course outcomes, with ongoing support to facilitate their progress.

A record of the learning support services provided, along with documented accessibility accommodations, will be maintained in the student's file as a point of reference for academic assistance and progress tracking.
